

II. SPECIFICATION AMENDMENTS

Please replace the Abstract on page 17 as rewritten below:

A method and an arrangement are provided for indicating the specific use of a packet-switched communication connection between a mobile station ~~(401)~~ and a fixed packet-switched data transmission network. The activation of a new packet-switched communication connection involves the step of transmitting ~~(201)~~ an activation request message with a service type indicator field ~~(302)~~ for which a set of service type indicator values have been defined. An additional step is performed for transmitting within the activation request message an indicator value ~~(302b, 312b, 322b, 332b)~~ indicating the specific use, in more detail than the service type indicator values, of the packet-switched communication connection the activation of which is requested with the activation request message.
